ARKKI collection

LEED® COMPLIANCE

Modern offices require organization and order, which is why smart solutions are needed to help people with the difficult task of organizing everything while still leaving everything easily accessible. The ARKKI collection meets these needs thanks to its versatility and configurability. It offers customizable solutions thanks to open compartments, doors, and pull-out drawers. The modular elements also allow for subsequent reconfiguration of the compositions to adapt to new spaces. The melamine product lines are:

Aba

Concerto

Credenza

Pedestals and service side units

MGR collection

LEED® COMPLIANCE

Inspiring the imagination of new solutions, facilitating management and decision-making processes, making the many hours spent in the office comfortable, and communicating the charisma associated with the role: this is the vocation of a manager's office. From this vision was born MGR, the Bralco collection dedicated to managerial offices. The collection comprises three lines: Sile, Sile 4, and Sile-e. Elegant desks and accessories that adapt to different needs thanks to the available fixed and movable tops. Structures that express lightness and solidity through the various types of supports. The melamine product lines are:

Sile

Sile 4
